PROFESSIONAL SUMMARY

Technical Founder, Product Builder, and Operations Leader with experience developing and scaling technology solutions across e-commerce, logistics, food delivery, and digital commerce. Founder of MartFlex, a multi-vendor marketplace platform connecting buyers, sellers, and delivery riders through integrated shopping, delivery, and payment solutions.

Skilled in product development, business operations, project coordination, and backend engineering, with hands-on experience in Node.js, Express.js, PostgreSQL, Prisma ORM, REST APIs, cloud services, and payment integrations. Proven ability to lead cross-functional teams, manage business operations, and translate complex business challenges into scalable technology solutions.

Passionate about leveraging technology, innovation, and entrepreneurship to drive digital transformation and economic growth across Africa.

WORK EXPERIENCE

MartFlex Go Limited 2023 - PRESENT
Founder & Technology & Operations Manager

- Founded and lead a multi-vendor e-commerce and logistics platform connecting buyers, sellers, and delivery riders.
- Managed product development from concept to launch, coordinating developers, designers, and operations personnel.
- Designed and implemented business processes for marketplace operations, food delivery, vendor management, and customer support.
- Led vendor acquisition and onboarding initiatives to expand marketplace offerings.
- Coordinated logistics operations and rider management to improve delivery efficiency.
- Oversaw strategic planning, budgeting, growth initiatives, and day-to-day business operations.
- Worked closely with software development teams to build and improve mobile applications and administrative systems.
- Developed partnerships with local businesses, vendors, and service providers.
- Managed customer support processes and resolved operational challenges across multiple business functions.
